

### Invisible snow peak Natural fortress

"The ridge of the world"---Himalayas lies on the border of southwest of China, from of old this natural fortress was used for defending against the enemies. While the different climate of both sides is formed, due to her exist.

The Air Curtain of GREE is installed at the outlet and inlet of air conditioner environment, to produce powerful airflow and form an air curtain, and isolate the air of indoor side and outdoor side. Thus, it's like a barrier for air exchange, mosquitoes, dust etc. The Air Curtain of GREE just likes the Himalayas invisible lies across the inside and outside, furthest maintains the temperature differences between the outdoor and indoor and performs splendidly.

### New design Powerful function

- Adopts the new designed cross flow motor, the airflow of outlet is high speed, sustaining powerful, the airflow of downward formed an invisible "Wall" from the top to the floor.
- Adopts name brand motor, excellent performance, reliable operation, and long lifetime.
- We developed the microcomputer control device with intelligent operation. It only needs to press the button and the operation can be completed.
- The low noise, high efficient fan motor, powerful wind, provides a quiet and suitable environment for you.

### Superexcellent quality Humanized taste

- The body is adopted the excellent galvanized sheet steel, painting processing of both sides, the powerful anticorrosion and antirust capability, which could not be replaced.
- Good structure and intensity, beautiful configuration, easy for cleaning and wear well.
- With the manual control panel, moreover 10 meters long distance remote controller is provide for you. It is convenient for the users' desire and reduces the difficulties in installation location, to consider carefully from everywhere.

### Installation dimension Units (mm)

Model	A	B	C
GCA900LA	160	800	870
FM-1 25-9-K			
GCA1200LA	160	1100	1170
FM-1 25-12-K			

### Technical specifications

Model	Length	Diameter of wind wheel	Power supply	Power (W)	Fan speed (m/s)	Noise dB(A)	Weight (kg)	Outline dimension
